# Evolution of Corporate Legacy Systems

Enterprise AI ROI is stalled because AI can't execute work inside legacy Enterprise systems.

Scope one

## Enterprise AI Investments

Enterprises are investing heavily in AI agents, copilots, and automation yet ROI stalls where REAL WORK happens: core legacy platforms.

## Enterprise AI Investments

 Stackbase  
systems

Make AI  
agents,  
**do real  
work.**

→ Request a Demo

# AI can reason. Make it execute.

StackBase Systems is the missing execution layer that connects AI agents directly to legacy enterprise systems safely, at scale, without rewriting a single line of production code.
